

# ACCESSORIES

## Fire rated vision panel

### DESCRIPTION

Vision panels utilising Pilkington Pyrodur™, or Pyroceram glass for up to 4 hours of fire rating.

### APPLICATIONS

Fire doors located in car parks, factories, schools, hospitals, or wherever there is a need to see through a fire door.

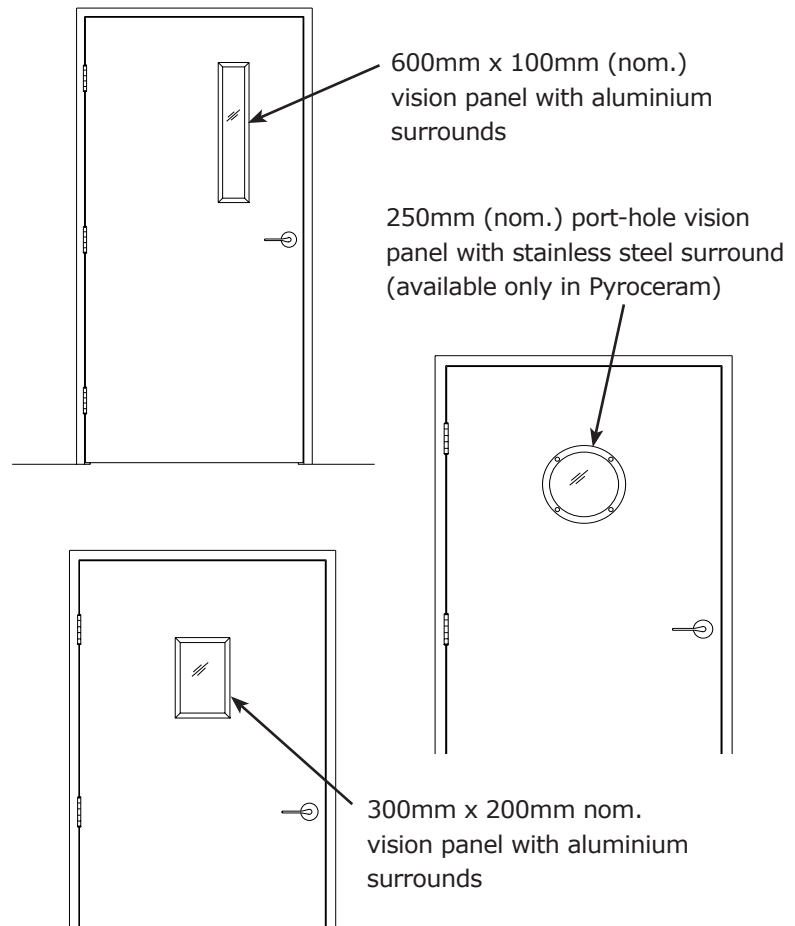

*Note: Australian Standards 1530.4 and 1905.1 limit visible area for glass that has an insulation value less than 30 minutes to a maximum area 65,000mm<sup>2</sup> when used in fire doors.*

### FEATURES

- Fully certified to Australian Standards
- 13mm Pilkington Pyrodur glass
  - Perfectly clear glass
  - Up to 2 hr fire rating
  - Acoustically rated to 38 Rw
- 5mm Pyroceram ceramic glass
  - Slight bronze colour in appearance
  - Up to 4 hr fire rated
- Standard sizes:
  - 300 x 200mm (nom.),
  - 600 x 100mm (nom.),
  - 250mm (nom.) diameter port-hole (only available with 5mm Pyroceram glass)

### OPTIONAL EXTRAS

- For vision panels greater than 65,000mm<sup>2</sup> visible area, please refer to "Glass fire doors" within the Fire Door section.

### HOW TO SPECIFY

*Eg, "Door to have 600 x 100mm (nom)\* Pyropanel PVP-Pyrodur\* vision panel including surrounds..."*

\* denotes example - delete or change or specify as required

### GLASS DATA
