

FIRE COLLARS

Retrofit Fire Collar (Single-fit)

DESCRIPTION

A bolt-on, steel-cased retro-fit fire collar housing an intumescent material which is activated in the event of fire, crushing the plastic pipe and sealing against the passage of flame and hot gases. The intumescent material is unaffected by water, atmospheric influences and industrial environments, and is also resistant to dilute acids, alkalis, paints and conventional construction materials such as gypsum, lime, cement and adhesives.

APPLICATIONS

Suitable for use in fire rating plastic pipes passing through floors in high residential construction, flats, townhouses, apartments, civil projects, health care and aged care facilities, offices, etc.

FEATURES

- Fully certified to Australian Standards AS1530.4 and AS4072.1
- 7 collar sizes service pipe sizes from 32 to 150mm (nom)
- Low height of collar ensures maximum clearance for pipe fittings
- Quick and easy to install - no adjustment necessary
- A cost effective fire stopping solution
- Multi fit collars also available (see Tech Sheet PAS-02).
- Approved for installation on underside of masonry slabs, or attached to either side of masonry walls or plasterboard walls.
- 10 year warranty on intumescent material.

INSTRUCTIONS

- Clip collar around pipe
- Attach collar to underside of slab or to either side of wall using steel fixings (Dynabolts, steel knock-ins for masonry elements and screws with washers for plasterboard walls).
- Seal any gap between collar and underside of slab or wall with Pyropanel fire rated acrylic sealant (do not seal between pipe and inside of collar).

HOW TO SPECIFY

Eg, "Fire Collars to be Pyropanel 'RF' Retro-fit (single-fit) fire collars , installed as per manufacturers instructions"

* denotes example - delete, change or specify as required
